Solutions for large Libraries

Managing an extensive catalog

For large metropolitan libraries, managing a large catalog of books can be time consuming.

This program offers a solution for storing media data, adding more media editing existing copies and quantities, as well as removing titles from the database

———

What is Currently Implemented?

- Create, edit, and delete media from database
- View the current collection of media
- See what media are available to be checked out
- Search catalog for titles and authors with autocomplete
- Log-in validation
- Site navigation

What can be improved?

- Expand app for use by library patrons
  - Media reservations
  - Waitlists
- Improved look and feel of site

Product Roadmap
